

Tube rollers to prevent pipe squashing

Replaceable German steel blade

Locking feature

Ergonomic grip

Product overview

The AmbiProCut 26, is a robust and light scissor system used to excel in pipe cutting. The blade has a unique geometry for cutting pipes, allowing for a smooth and precise cut whilst retaining a convenient and fast use.

The AmbiProCut 26 has a quick switch unlock system to open up from its stationary position simply. To add to this, the quick switch unlock is easily accessible by use of one hand, so no re-adjustments are needed to be made, making this the most convenient pipe-cutting tool.

The tool is made from steel for strength and resistance, whilst remaining easy to manoeuvre. Alongside this, the AmbiProCut 26 offers a removable blade (German steel) to allow for longevity and money savings while removing the need to ever buy another pipe cutter.
