

## Premium levelling compound datasheet

Fibre-reinforced, flexible, self smoothing levelling compound. Can be laid in 2 - 50 mm in a single application

**20 KG**

### Application data

|                                  |  |
|----------------------------------|--|
| <b>Mixing ratio</b>              | 20 kg grey powder to 4 - 4.25 litres, cold, clean water                            |
| <b>Thickness</b>                 | 2 - 50 mm per single application   |
| <b>Pot life</b>                  | 20 - 30 mins approximately   |
| <b>Walk on time</b>              | For light foot traffic, approximately 2 - 2.5 hours at 20°C                        |
| <b>Floor coverings</b>           | After 24 hours - bonded coverings  |
| <b>Installation temperatures</b> | Min 5°C (protect from direct sunlight and draughts)                                |
| <b>Coverage per 20 kg bag</b>    | 1.6 kg x thickness (min thickness 2 mm) x metre square = material in kg's required |
| <b>Shelf life</b>                | 6 months from date of packing (see bottom of bag)                                  |
| <b>Surface preparation</b>       | Clean sound and primed substrates  |
| <b>Priming</b>                   | AmbiPrime primer diluted or neat (see data sheets)                                 |
| <b>Application data</b>          | By hand or pump application (using appropriate equipment)                          |
| <b>Cleaning tools</b>            | Wash immediately after use with clean water  |
| <b>Storage</b>                   | Should be stored under cover, frost free and in dry conditions off the ground      |
| <b>Manufactured</b>              | Made in England  |

**Notes:** Setting times are dependent upon the ambient temperatures, humidity and absorbency of the subfloor. Figures quoted are for 20°C. Lower temperatures will extend the setting times, whilst higher temperatures will accelerate the product.

**Application:** Use the mixed material within 20 - 30 minutes, pour the product onto the primed substrate and spread into place using a trowel.
